Areas not recommended for development (Red Areas)

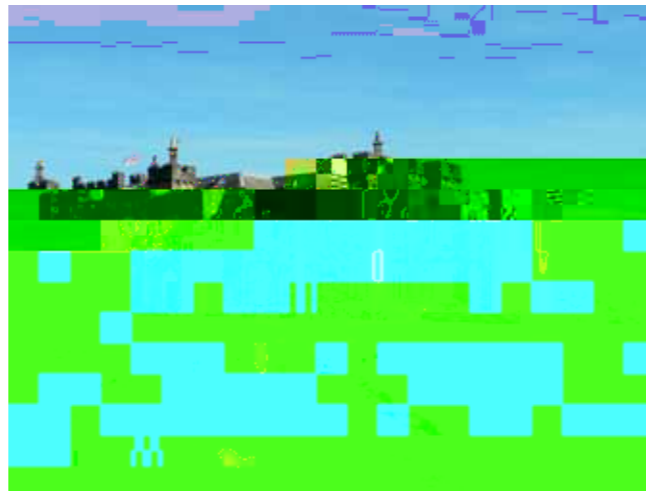

A a dB e

would be no interruption of the panoramic views of the coast;
The two new properties in this location have established a precedent by being sited on the lower lying ground and it would be possible to achieve 4 or 5 more units here provided that a landscape structure of new broad-leaved long-term woodland planting is established to anchor the new properties into their setting;

It is considered that the proposed development would not interrupt views to the coast;

Areas not recommended for development (Red Areas)

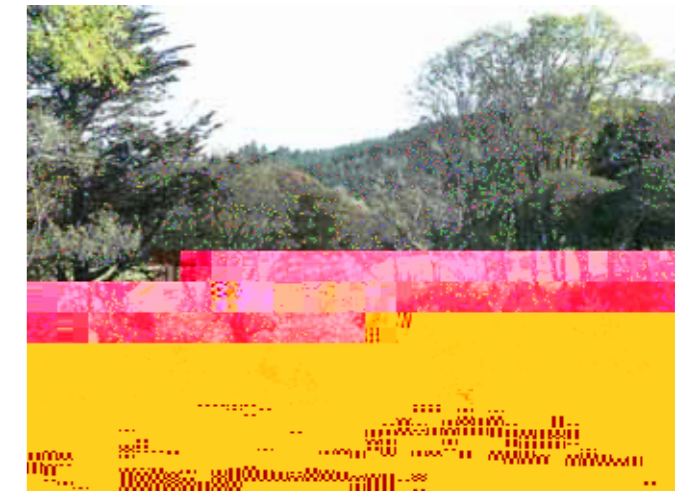

The proposed development would not interrupt views to the coast;
